

SofTop™ Comfort Flooring

Self-smoothing polyurethane flexible comfort flooring

SofTop Comfort Flooring is an extremely durable and robust, yet soft and comfortable flooring system. The system is solvent-free medium viscosity, utilising two-component polyurethane resin based technology which is applied as two self-levelling layers with an initial membrane followed by a self-smoothing floor screed. Designed for internal use for a variety of applications, the product is environmentally friendly as it uses natural plant oils in its formulation and is installed as a permanent long-term flooring solution to become part of a building as a finish.

Features & benefits

- Hard-wearing yet soft finish
- Self-smoothing during application
- Soundproof
- Seamless non-dusting finish
- Hygienic finish
- Easy to clean and maintain
- High chemical resistance
- Resistance to impact from sharp objects.

Applications

- Hospitals
- Schools
- Workshops
- Playgrounds
- Offices
- Institutions
- Exhibition areas
- Any other application where tough performance floor finishes are required with a soft finish.

Ease of application

Flexible floor screeds are obtainable in one application for a tough and durable finish in a variety of thicknesses and colours, wherever heavy-duty performance is required.

Seamless and soft

SofTop Comfort Flooring provides an aesthetically appealing, seamless hard wearing resin flooring system which is soft to underfoot meaning its sound absorbing and comfortable to wear.

Slip resistance and durability

SofTop Comfort Flooring is tough, resilient and abrasion resistant. A smooth finish can be provided or a slightly textured profile can be incorporated to enhance non-slip performance which is achieved by incorporating a range of aggregates for different textured finishes.

Colour availability

The product is supplied in a variety of grey shades and colours.
