

# Cloudwater Brew Co

## United Kingdom

## Project

Sherwin-Williams has been credited with playing a key role in getting a new Manchester brewery ready for its big launch.

Cloudwater Brew Co chose Sherwin-Williams for vital improvements, to ensure the Piccadilly Trading Estate site would be a safe environment in time for the unveiling.

Co-founders Paul Jones and James Campbell were concerned that the warehouse floor was potentially dangerous due to its poor anti-slip performance.

**Substrate:** Concrete.

**Requirements:** To provide a safe, anti-slip finish.

**Specifications:** Meeting all relevant environmental and health and safety regulations.

**Area coated:** 400m<sup>2</sup>.

**Client:** Cloudwater Brew Co.

## System

The system specified after inspection was Resuthane™ TG69, a heavy-duty polyurethane screed with a matt-textured finish, particularly suitable for areas requiring slip resistance and durability.

Paul Jones said: "I'm afraid our industry is filled with horror stories of poorly-performing floors and empty promises. We had complete confidence that we'd end up with the flooring we needed.

"The installation team was professional and helpful throughout. We are completely happy with the work."

## The Sherwin-Williams Difference

By putting our customers first, we know that the innovation, imagination, research and development we put into each and every product will be worth it. You are at the centre of our thinking wherever we operate around the world across five continents whether it is advice, specification or on-site inspection. You are the reason we exist. This is the Sherwin-Williams difference.
